ZTECH GRIPS

Spinning Casting

Fore grips are triangular to prevent roll-over for maximum control and stability on reeling/cranking in large fish.

Flex strong water tight attachment points to grips, reel seat and blank.

Palm rest on casting grip

Ergonomically curved grip for maximum control and casting distance.

Angled rear butt cap for comfort, power and control.

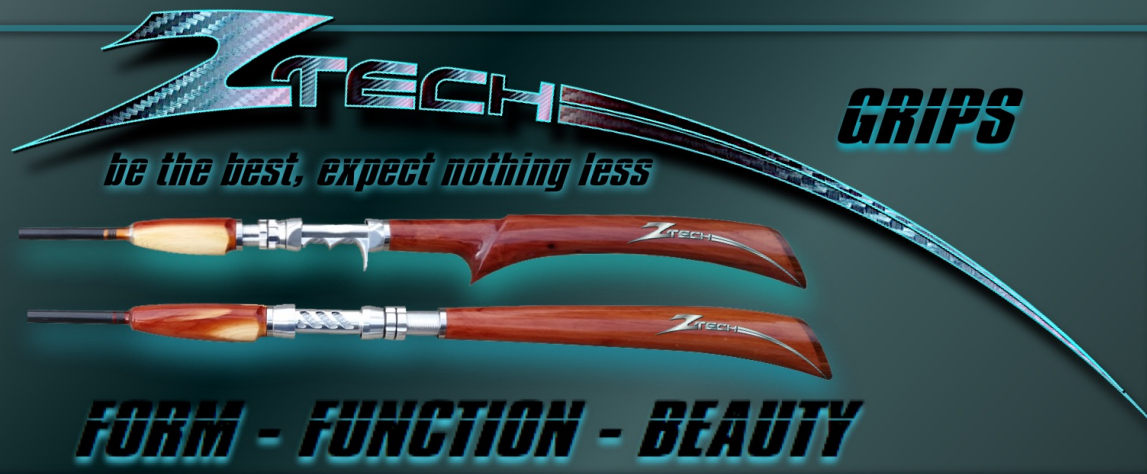

Grip contact to rod handle and reel seat means maximum strike sensativity for better hook set.

Casting grip palm rest prevents your hand sliding down the grip and allows for better technique in handling fish.

Rod blank curves inside of the hollow grips For unprecitented control and sensativity

FORM - FUNCTION - BEAUTY

Design features add grace, sensativity, strength and durability; Translating to pure art in motion.

THE BEAUTY OF WOOD GRIPS...LIKE FINELY CRAFTED GUNSTOCKS.

FORM

1. Ergonomically curved grip for maximum casting control.
2. Fore grips are triangular shaped to prevent rod roll-over for maximum control and stability on reeling / cranking in large fish. See Fig. 2
3. Curved rear grip for maximum casting distance and control.
4. Angled butt cap for comfort, power and control.

FUNCTION

1. Casting grip palm rest prevents your hand sliding down the grip and allows for better technique in handling fish.

FORM

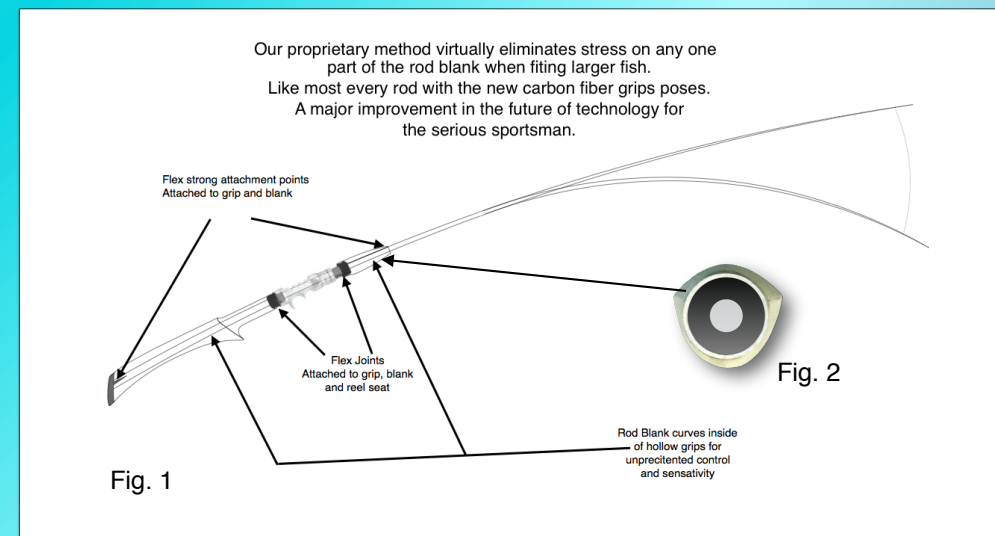

1. Ergonomically curved grip for maximum casting control.
2. Only grips not made from production graphite tubing.
3. Fore grips are triangular shaped to prevent rod roll-over for maximum control and stability on reeling / cranking in large fish. See Fig. 2
4. Curved rear grip for maximum casting distance and control.
5. Angled butt cap for comfort, power and control.

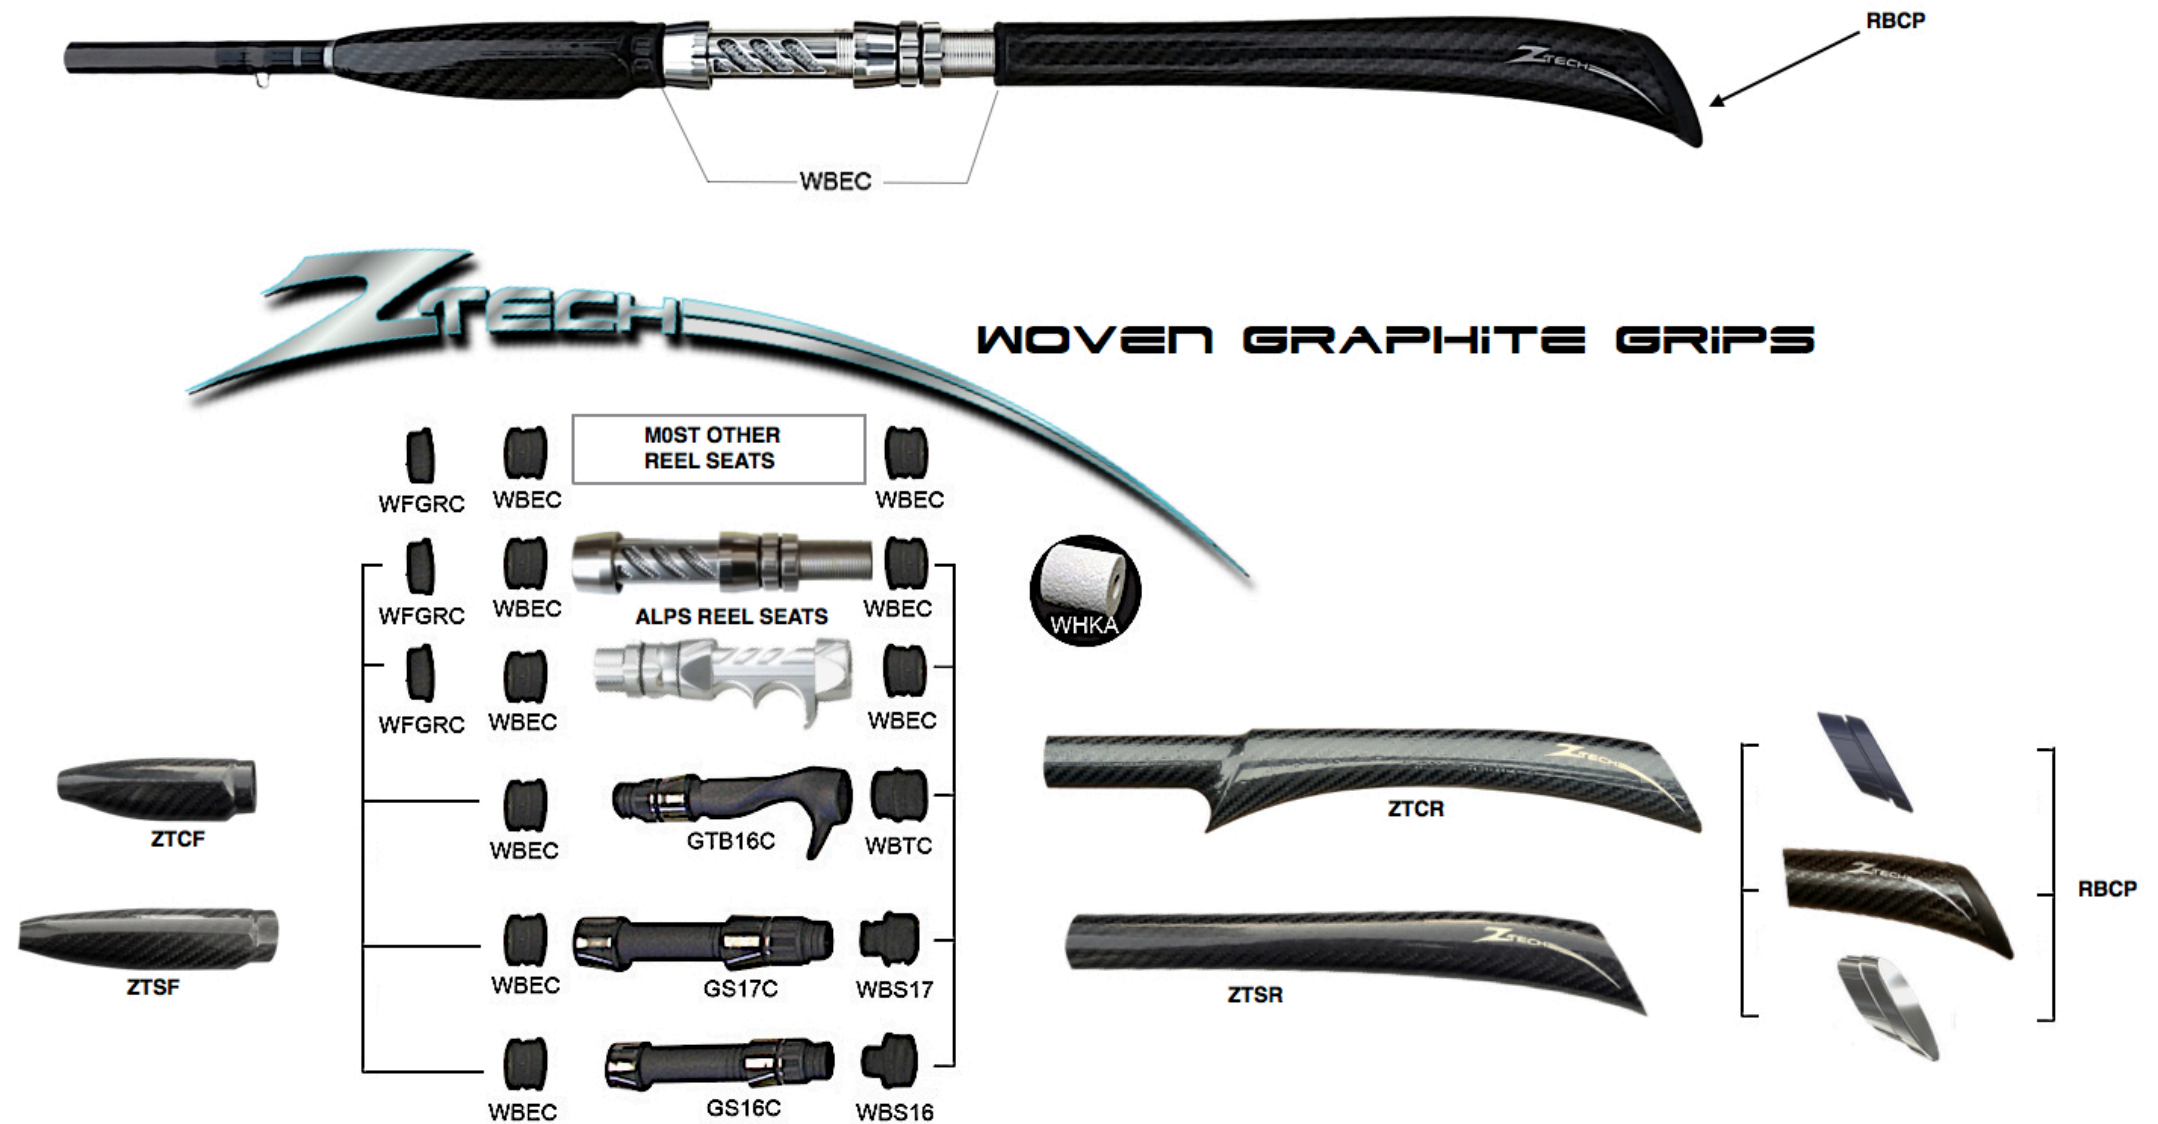

FUNCTION

1. Grip contact to rod handle and reel seat means maximum strike sensitivity for a better hook set.
2. Because the blank curves through the entire length of the grip to the butt. It relieves stress on any one point. See Fig. 1
3. Casting grip palm rest prevents your hand sliding down the grip and allows for better technique in handling fish.

BEAUTY

Design features add grace, sensativity, strength and durability; translating to pure art in motion.

All of the EVA bushings for graphite tubing, trim rings, winding checks are available on most any rod building web page.
